

Objective:

Start establishing the pages and streamline the workflow process.

Key Results:

1. Line up components to create the landing page and other pages.
2. Install daisyUI – Tailwind Components.
3. Accomplish at least 20 story points and 5 user stories.
4. Catch up on tasks due to misunderstanding from the previous sprint (Sprint 0).

Sprint 2 Summary:

- **Sprint Velocity:** 20%
- **Focus Areas:**
 - Project Kickoff
 - Requirements adjustments to finalization
 - Enhancing Workflow process
 - API Development
- **Achievements:**
 - Managed workflow processes using Jira, GitHub Discussions – in raising issues.
 - Accommodated 28 story points and 8 user stories, currently under review.
 - Configured Jira for better deliverable tracking.
 - Nearly completed UI building
 - Utilized a style library to reduce styling effort.

Sprint 3 Plan:

- **Focus Areas:**
 - Complete UI implementation
 - Configuring Jira Xray or alternative testing tools.
 - Implement QA and code review deliverables from Sprint 2 in the UAT environment.
 - Conduct backend onboarding for future sprint.
- **Commitment:** Our team is committed to advancing the implementation phase with a focus on UI Implementation, enhanced connectivity, and thorough testing to ensure high-quality deliverables. Additionally, we commit to taking on at least 20 story points and prioritizing the completion of UI user stories to further progress toward backend development.
