Sprint Velocity: 50%

What Went Well:

The team excelled in various focus areas, including OTP Implementation, Testing Tools, Routing and Route Guards, as well as Sign up and Header. They successfully implemented Email OTP for Sign up, seamlessly integrated Xray Test Management Tools and UIPath automation testing, efficiently completed Footer Routing and other routing tasks, and effectively implemented Signup Validations.

Despite encountering challenges, the team's collaborative efforts ensured steady progress toward completing UI development and transitioning to backend implementation.

What Needs to Be Done:

In the upcoming sprint, our focus will be on developing essential backend features such as *"Add Property"* and *"Wishlist."*

Areas for Improvement:

To optimize our workflow and overcome challenges more effectively, we aim to enhance workflow utilization to ensure better coordination and mitigation of blockers.
